

Small rinser with suction trailer

Operation

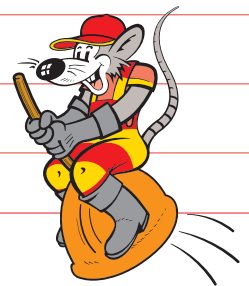

This unit is particularly suitable for maintaining sewer systems in properties.

All vehicles are equipped with a powerful high pressure rinsing device, various mechanical pipe cleaning devices, a push TV camera for quality control and all replacement material.

The accompanying suction trailer makes it possible to perform suction work in the same process.

Technical data

Total vehicle weight	3500 kg
Max. height	1,95 m
Performance: Pressure/ flow rate	150 bar/100 l/min
Rinsing hose: Ø/length	5/8" / 40 m, 1/2" / 60 m, 40 m reserve
Radio remote control	Yes
Push camera	36 m/coloured
Suction tank volume	1200 l
Suction hose 60 NW/75 NW	35 m/15 m
Suction performance with 60% vacuum	300 m³/h

Areas of application

- Pipe diameters NW 50-250 mm
- Suction work in smaller pits and shafts
- Sewer maintenance in properties
- Rinsing in underground car parks
- Emergency unblocking service

Complete equipment

- High pressure rinsing device with 13 nozzles
- Suction trailer with radio remote control
- Wet and dry suction device
- Spiral drill with various drill heads
- Submersible pump
- Replacement material and expendables
